

We cultivate a deep respect for the whole of Earth & Creation, as we help people connect with a passion for Life, through the shared experiences of preparing & enjoying beautifully-sourced, delicious food.

Rooted deeply in authentic expressions of culinary traditions from around the world, we serve all people looking for high-quality, ethically-sourced, vital foods. We delight seekers of exquisite food experiences, as well as those with demanding diets, as we stir magic & healing stories into everything we prepare.

Further, we plant the seeds of a more resilient world by sharing skills & knowledge required to prepare amazing food anywhere, while investing in a community food system that nourishes deeply any place we call Home.

*Thank you for your
fierce determination
to serve Life on Earth!*

the CSK :: *a Community Supported Kitchen* :: presented by West Philly's *Cultural Engine*

We plant the seeds of a more resilient world by sharing skills & knowledge required to prepare amazing food anywhere, while investing in local community & a *regenerative food system* that nourishes deeply any place we call Home. Further, we help people connect with a passion for Life, through the shared experience of preparing & enjoying, beautifully sourced, delicious food.

We host regular faemily cook days, open to anyone, and offer a subscription menu (listed below) of prepared foods & pantry staples that are designed to add depth, zest, and serious nourishment to your day-to-day food world.

FERMENTS

APPLE SPECIAL

ALLI-ZINGER PASTE

HOUSE SPICE

SUNFLOWER ZA'ATAR

BONE BROTHS

CHILI BLACK BEAN SAUCE

A note on *how* we operate :: We strive to find a transcendent balance between gathering the financial abundance we need to offer our goods & services, while keeping our offerings accessible to all. It is your sliding-scale donations, time trades, & bartering that keep our kitchen running in *the gift economy*.

A *regenerative food system* is one that heals the planet, and raises the collective health of our shared communities. Meanwhile, we explore the potential of living systems to self-organize, as we add value to our interconnected lives.
